

## **Mintos marketplace exceeds 35 000 investors**

LONDON, LENDIT EUROPE, OCTOBER 9, 2017

Press release

### **Mintos marketplace for loans has reached a new milestone – 35 000 registered investors from 64 countries.**

About 2 000 new investors join Mintos each month. This has allowed for loans worth more than EUR 325 million to be funded through Mintos in two years since its establishment. More than EUR 200 million has been funded in 2017 alone, making Mintos a clear market leader in continental Europe with a 40% market share, according to [AltFi Data](#).

As of September 2017, about EUR 1 million is invested in loans through Mintos daily, which is three times more than just a year ago. Mintos is growing fast, and this growth is reflected in the rapid expansion on both sides of the marketplace.

On the supply side of the marketplace, there are 27 loan originators from 13 countries. This makes Mintos the world's largest marketplace of its kind. The first loan originator from Africa just joined the marketplace, making it the third continent from which Mintos offers loans.

Martins Sulte, CEO and Co-founder of Mintos says: "All of these numbers mean a lot to us. Creating a global marketplace where retail investors gain access to a new class of assets is our main goal. We believe investing should have no borders, and are excited for each step that takes us closer to this vision."

Mintos ([www.mintos.com](http://www.mintos.com)) is a global online marketplace for loans. It provides retail investors with an easy and transparent way to invest in loans originated by a variety of alternative lending companies around the world. Investors earn great returns and gain access to unparalleled diversification possibilities within a single marketplace, while loan originators gain access to a flexible funding model.
